

IRON WORKERS DISTRICT COUNCIL

PHILADELPHIA AND VICINITY BENEFIT & PENSION PLAN

March 11, 2010

To Whom It May Concern:

In December 2009, the Iron Workers District Council Philadelphia and Vicinity Benefit and Pension Plan contracted with Scantek for a Document Management initiative. A pending move to a smaller office, with limited storage, necessitated having our important documents scanned and digitally stored. After checking with other Union Funds and some of the professionals we deal with we requested bids from three companies that we felt could meet our needs.

After an extensive review of all three bids ScanTek was selected. We felt that with their competitive pricing and their experience with other Taft Hartley funds they had an understanding of our situation.

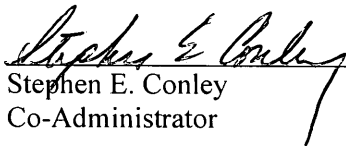

In the three months we have dealt with them we have encounter no problems. In fact everything has been above our expectations. Their staff is knowledgeable, prompt and courteous. The training of our employees was quick and efficient to the point that our employees felt very comfortable accessing the converted data after one session.

I would recommend Scantek to anyone in need of implementing electronic document management especially any other Union Trust Fund.

If you have any additional questions about Scantek please feel free to contact me.

Sincerely,

IRON WORKERS DISTRICT COUNCIL BENEFIT AND PENSION PLAN
